SIDE GATES

Looking for a secure and professionally installed side or garden gate for your home?

Our qualified experts measure, build and install all of our side gates to produce a perfectly fitting and a professional result, every time.

We also provide DIY Gate Kits, ready made for you to easily install.

DOUBLE GATES

All of our gates are designed to accommodate your style and specification.

Our double gates can also be made to match new or existing screens, gates or fencing.

Our gates come in single sliding, double or single-hinged forms, as wooden horizontal slat gates or with aluminium slat. All can be made into remote operated automatic gates.

DRIVEWAY/ SLIDING

We make our entire range of sliding driveway gates with the best quality timber or aluminium, and steel materials to your unique specifications.

Our entire range of driveway gates are available in both automatic or manual functionality.

If you choose to have an automated system and wish to enjoy further security with your automatic driveway gates, a highly popular electric locking mechanism can be placed on the gate's opening motor to ensure it cannot be manually opened by others.

CUSTOMISED GATES

Looking for something Unique?

We provide custom automated gates in Perth, fit to your design, preference and undoubtly will make a statement.

Choose from striking laser-cut screen gates, a free-standing awkward sized gate, or doing something a bit different with your timber gates such as installing different widths of timber to make an impactful design statement.

We can fit reliable and sturdy electric motors to our customised gates for ease of entry and added security.

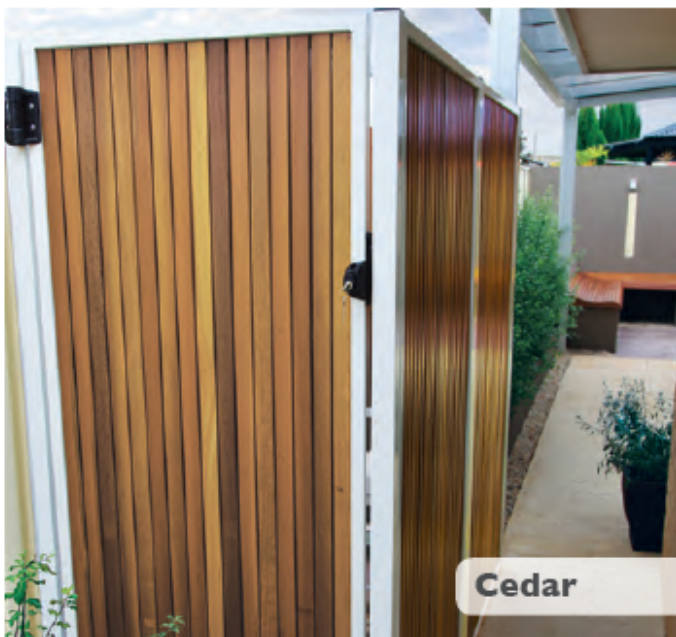

Bringing your ideas
to life.

SELECT YOUR MATERIAL
